

I am requesting guidance to assist me to read the screen in front of me rather than pulling the person's energy into my space. Is there a guide that can assist me with this?

So here you are able to communicate with me in immediacy yet see we are connected, but yet you have me outside of your space.

Try not to reach but rather see, through your knowingness, you can feel me sense me, see my form correct

Yes, but to get deeper into the system of energy in order to clean it out

Let's try now

Okay

Go and look into the sixth chakra as described

I see a bright light that is illuminating from your forehead

yes, now go deeper

What do you see?

I walk through the light yes

Yes

Don't reach just go

I see a bright area super bright, but not painful to my eyes

Like crystal bright

Yes

White sand crystalline sky

Yes

And I see you

Hi

Hello so it is as if each area is a portal into rather space

Even the chakras

Let's work on this

First chakra

She immediately dropped in another being, smaller males light blue skin as well

Is it okay to feel the chakra moving spinning near mine?

Yes

It is spinning very fast

Now try to remove that tube, only through the sixth

You don't have to connect your chakra to theirs of the same location, no

Oh I see

Yes relax

You can ask the soul spirit energy to spin around politely (basically from love)

Yes, tap the chakra and look at the cone

No, you do not have to pull it out just tap try again

As I try again, I am going from the second to the fourth

Yes, I understand.

Today keep your fixed point of reference always

Do not waver from this, I am showing you a clean screen of the chakra with multiple cones yes, I counted nine

See the hara

Yes, you can bring in the rays of plasma, why bright blue this is the strand of energy the life force

you can bring in the rays of plasma, why bright blue this is the strand of energy the life force

Can I try

Left is front (chakra) and right is back (chakra)

Yes

Do not try to bend the system rather see the other side by just moving your awareness to the opposite side (I tried to move the chakra from front to back, had much resistance, was trying to turn it like I do the person in my screen)

And then how to synch them from where do I look

Forward

Forward facing is the entire energy system and left is the front and right is the back

Every time

Yes

Keep the vision clean

So now say I am trying to repair or heal the person and I have to go deep into that chakra or energetic system, how am I facilitating that? Do I have to lay them down?

See the chakra yes, you leave the holographic image of the individual there and you just pull a close-up image of it, see how you can see both sides and images

Yes that is it that is the point of reference, now take a moment and evaluate the chakra I will await

See how much clear you can see how clear the image is

Again, do not pull in, do not pull from the body release the strain

May we try again?

Yes and yes you may (I asked to put my hands on my lap)
